

IMORU VIII

March 11 - 13th, 2019 Hamburg, Germany
8th International Meeting On Reconstructive Urology

Invitation & Call for Abstracts

20
YEARS OF
IMORU

IMORU VIII

Welcome

Dear Colleagues,
I am glad to invite you to Hamburg for the 8th IMORU; that, following our triennial tradition, will take place March 11-13th, 2019 at the University Medical Center Hamburg-Eppendorf.

Urethral reconstruction remains one of the most important topics in the field of reconstructive urology. Parallel live-surgeries from two operation rooms and semi-live presentations provide the opportunity to observe the experts and discuss their techniques. In addition, we will have live transmissions from different centers in the US and Europe. During poster sessions, you will be able to present and discuss your own experiences.

A faculty of world renowned surgeons will share their expertise during reconstruction of penile, bulbar & posterior strictures and hypospadias repair in children and adults. Another main topic is the reconstruction of the external male genitalia; where corporoplasty in patients with Peyronie's disease and implantations of penile prostheses will be presented. Solving complications after prostate surgery: such as incontinence, urethra-rectal fistula or anastomotic stricture after radical prostatectomy is another field of reconstructive urology. Procedures to manage these complications, e.g. artificial urinary sphincter implantation, will also be presented. Minimal invasive surgery is entering the field of reconstructive urology more than ever. Famous centers for robot-assisted reconstructive surgery will directly transmit into the lecture hall and show their techniques for ureteral reimplantation, pyeloplasty and reconstruction of the urethra.

We are looking forward to seeing you in Hamburg, March 11-13th, 2019!

Margit Fisch, M.D.

Professor of Urology, Director,
University Medical Center Hamburg-Eppendorf

IMORU VIII

Scientific Program

Monday, March 11th (8 a.m. to 6 p.m.)

Live Surgeries:

- Artificial urinary sphincter with different cuff positions
- Male sling
- Urethral reconstruction
(different stricture locations and techniques)

Transmissions:

- Robot-assisted bladder neck sphincter
- Robot-assisted VY plasty / urethral reconstruction

Semi-live:

- Different techniques of urethral reconstruction

Poster Session

Tuesday, March 12th (8 a.m. to 6 p.m.)

Live Surgeries:

- Penile prosthesis
- Corporoplasty
- Bulboprosthetic reanastomosis
- Recto-urethral fistula repair
- Male to female transgender surgery
- T-plasty for bladder neck sclerosis

Transmissions:

- Robot-assisted ileal ureter replacement

Semi-live:

- Different techniques of urethral reconstruction
- Phalloplasty

Wednesday, March 13th (8 a.m. to 4 p.m.)

Live Surgeries:

- Adult and pediatric hypospadias surgery
- Ureteral neoimplantation into bladder
- Open perineal reanastomosis
- Meshgraft technique for urethral reconstruction

Transmissions:

- Robot-assisted ureteral neoimplantation / pyeloplasty
- 3D laparoscopic pyeloplasty

Semi-live:

- Different techniques of urethral reconstruction

March 11 - 13th, 2019 - Hamburg, Germany
8th International Meeting On Reconstructive Urology

Universitätsklinikum
Hamburg-Eppendorf

in cooperation with ESGURS

Abstract submission and registration at www.imoru.de
Deadline for abstracts: December 1st, 2018

March 11 - 13th, 2019 - Hamburg, Germany
8th International Meeting On Reconstructive Urology

Faculty

Local Faculty

Marco Blessmann	Hamburg, Germany
Roland Dahlem	Hamburg, Germany
Oliver Engel	Hamburg, Germany
Margit Fisch	Hamburg, Germany
Silke Riechardt	Hamburg, Germany

Guest Faculty

Daniela Andrich	London, UK
Guido Barbagli	Arezzo, Italy
Rados DjinoVIC	Belgrade, Serbia
Julio Garaffa	London, UK
Joel Gelman	Orange, USA
Akio Horiguchi	Saitama, Japan
Jalil Hosseini	Tehran, Iran
Sanjay Kulkarni	Pune, India
Anthony Mundy	London, UK
James Fu Qiang	Shanghai, China
David Ralph	London, UK
Hunter Wessels	Seattle, USA

Live Transmission Faculty

Serdar Deger	Ostfildern, Germany
Emanuel Chartier-Kastler	Paris, France
Christophe Vaessen	Paris, France
Alexander Mottrie	Aalst, Belgium
Lee Zhao	New York, USA
James Porter	Seattle, USA

Guests of Honor

Rudolph Hohenfellner	Mainz, Germany
Jan Fichtner	Oberhausen, Germany
John Pascal Manyahi	Peramiho, Tanzania
Vito Pansadoro	Rome, Italy
Friedhelm Schreiter	Hamburg, Germany
Joachim Thüroff	Mainz, Germany

Latest information, abstract submission & registration at:
www.imoru.de @IMORU / #IMORU19

Main Topics

- Urethral reconstruction for stricture repair
- Surgery of the external male genitalia
- Reconstruction after complications of prostate surgery
- Robot-assisted surgery / 3D laparoscopy for reconstructive urology
- Hypospadias repair
- Transgender surgery
